

## **Medications:**

When your provider prescribes medication for you, do you know what you are taking? Here are some questions you can ask your provider to make sure you are taking medications that are best for you.

What are the side effects?

What will this medicine do to help me?

How will it make me feel?

Will it work with other medicines I take?

What does it cost?

Are there less expensive options?

How do you spell that medication?

What happens if I do not take this medication?
