

Procedures:

When your provider thinks you need a procedure, do you know why? Ask questions to make sure you are getting the procedure that is best for you and your health. Make sure you are fully informed before the procedure. Here are some questions to help:

What is the procedure for?

Why do I need this procedure?

What are the possible complications for the procedure?

What will it tell you?

How safe is this procedure?

How will I feel after the procedure?

Will I need to get someone to drive me home?

How much will it cost?

Are there less expensive options?

When will I get the results?
